Modular doors are modern design, interesting and innovative construction solutions. They are characterised by a stable, massive structure giving satisfaction of the high quality product. Use of veneers, especially from Top-Décor line with characteristic grains and structure intensify the impression of natural wood. CPL and ECOLINE laminates additionally confer resistance of the panels. Each of the door leaf modules is made of solid MDF board, pasted and prepared separately with all due diligence and attention.

The elements are soundly combined, ensuring stable and sustainable structure of the leaf. The use of modules in the leaf construction makes it possible to create many different patterns on the basis of one model, thanks to which each of the customers has an opportunity to find a solution which optimally suits his needs.

Structure

Full frame structure of solid MDF ensuring stability

Nonrebated version

Glazing

Structure frame allows for esthetic, frameless system of glazing. In modular doors we use tempered frosted DECORMAT glass 4mm thick

Fittings

Available in versions for rebate and nonrebate doors

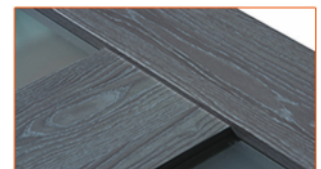

Sable fitting

Modules are joined with wooden dowels and a layer of glue

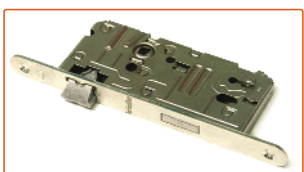

Surface

Elements pasted with ecological and innovative decorative materials: impressive Top Décor foil as well as CPL and Ecoline laminates ensuring resistance

Rebate version:

Lock in version: key/bathroom/cylinder
Spacing 72/50
Silver zinc

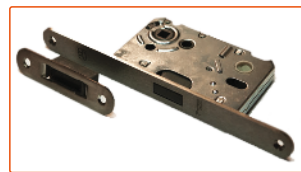

3 pivot hinges
Silver zinc

Non-rebate version:

Magnetic lock in key/bathroom/cylinder versions
Spacing 72/50
Silver zinc

3 hinges with 3D regulation
Silver Zinc

Possible solutions:

Single sliding system	Page 27
Double sliding system	Page 27
Hidden system	Page 29
Two-leaf system	Page 26
Soft fixed frame (OS)	Page 33
Adjustable frame (OR)	Page 30
Adjustable non-rebate panel door frame	Page 31
Overlay door frame – camouflage (ON)	Page 34
Accessories	Page 38-39

Options with additional payment:

Ventilation undercutting
Ventilation sleeves
“100” door leaf
Non-rebate door leaf
Sliding system door leaf

Perfect Door Slab Doors

Laminated doors are manufactured on the basis of permanent frame made from MDF board. Inside, as a stabilizing filling, "honey comb" is used. Leaf is covered on both sides with raw HDF board, which is pasted with decorative foil with wood structure, which, in the case of selected colours, has been strengthened with "wood look" effect (imitating pores of wood) or haptic effect (giving impression of touch of raw wood).

Typical of glazed laminated doors is connection of remarkable design with relatively low price.

In the case of HDF Varnished doors a colour difference may occur due to the technological heterogeneity of decorative elements.

PerfectDoor Innova Doors

INNOVA doors are innovative technology combining modern style with excellent quality. The wing is made of 2 MDF plates veneered with a material resistant to mechanical factors: PVC film. This allows the door wings to be used in public buildings like hotels, offices, as well as in the homes of demanding clients. Stronger, thicker than normal construction (43mm thickness) together with the PVC film creates door wings resistant to scratches, moisture, or the use of detergents, and the mounted rubber seal provides additional protection against noise and temperature. The door leaves can be combined with key, bathroom and cylinder locks. Fittings are made up of three pivot hinges with regulation. INNOVA line uses a special wooden frame.

Volume Set

Technical information:

- VOLUME leaf is intended to public utility and residential facilities as internal entrance doors
- Leaf has acoustic isolation $R_w=32dB$
 - Frame of the leaf made from MDF board, covered with two HDF boards,
 - Stabilising filling with HOMALIGHT board
 - Strengthening with massive steel flat bar 5mm thick
 - Leaf with increased thickness of 46mm
 - Additional rubber seal in the leaf
 - Interlocking door bolts
 - Three-bolt insert lock, silver zinc
 - Upper three-bolt insert lock
 - Viewfinder (for personal mounting)
 - Frame in the set

Set contains:

VOLUME wooden frame

Handle with upper rosette “MATI” in silver

Patented inserts

Aluminum threshold

Volume Alu Set

Technical information:

- VOLUME leaf is intended to public utility and residential facilities as internal entrance doors
- Leaf has acoustic isolation $R_w=32dB$
 - Frame of the leaf made from MDF board, covered with two HDF boards,
 - Stabilising filling with HOMALIGHT board
 - Strengthening with massive steel flat bar 5mm thick
 - Leaf with increased thickness of 46mm
 - Additional rubber seal in the leaf
 - Interlocking door bolts
 - Three-bolt insert lock, silver zinc
 - Upper three-bolt insert lock
 - Viewfinder (for personal mounting)
 - Frame in the set

Set contains:

VOLUME wooden frame

Handle with upper rosette “MATI” in silver

Patented inserts

Aluminum threshold

Fireproof Doors

Marcus II EI 60

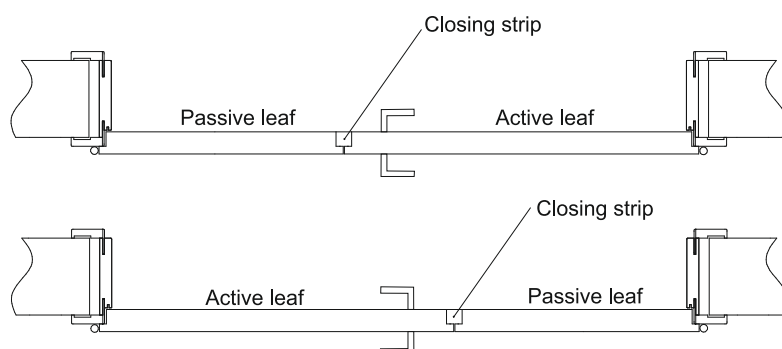

Double-Leaf Doors

In double leaf doors, we can use any model of leaves available in this catalogue, apart from Linos, Linos Alu, Solid, Solid Alu, Volume Set, Volume Alu Set, Marcus I, Marcus II.

It is possible to freely combine "60", "70", "80", "90" leaves.

The active leaf is standard spread leaf, while the passive leaf has a meeting stile installed on the rabbet, containing dampers and lock catch.

The price of fixed and adjustable door frame for double leaf doors is 30% higher.

The price of double leaf door includes the price of each leaf with additional price of meeting stile.

Wall Sliding System

This solution enables easy assembly of door leafs in rooms where you cannot, or you do not want to use traditional spreading doors. Door leaf or leafs (in the case of a double system) moves in aluminum guides placed above the door opening.

The sliding system includes:

- Aluminum guide with rolls and installation elements
- Spacer spat
- Curtain rail – masking frame in the colour of the leaf
- Guard beam in the colour of the leaf (not included in the double system)

Sliding leafs:

For the wall sliding system we use sliding door without rebates with the following dimensions:

- Single system: "60", "70", "80", "90"
- Double system: "2x60", "2x70", "2x80", "2x90"

In this version, all of the door leafs from this catalogue are available apart from Oskar, Nobel, Gremium, Regis, Klasyk, Preston, Lawa, Linos, Linos Alu, Solid, Solid Alu, Volume Set, Volume Alu Set, Marcus I, Marcus II, Innova.

In case of application of modular doors there is no possibility of ventilation undercutting in sliding leaf.

Options for extra payment:

Steel oval hand-rails or round in gold or chrome colour.

Set of hand-rails for one sliding leaf consists of 2 pieces.

Hook lock with a complete set of oval or round hand-rails in version with a key or WC in gold or chrome colour.

Hidden Sliding System

Sliding system as an aluminium structure for installation of carton-gypsum board for one-leaf or double-leaf doors hidden in the wall.

The sliding system includes:

- Aluminum cassette with installation elements
- Masking frames in sliding leaf.

Sliding leaves:

For the hidden sliding system we use sliding door without rebates with the following dimensions:

- Single system: "60", "70", "80", "90"
- Double system: "2x60", "2x70", "2x80", "2x90"

In this version, all of the door leaves from this catalogue are available apart from Oskar, Nobel, Gremium, Regis, Klasyk, Preston, Lawa, Linos, Linos Alu, Solid, Solid Alu, Volume Set, Volume Alu Set, Marcus I, Marcus II, Innova.

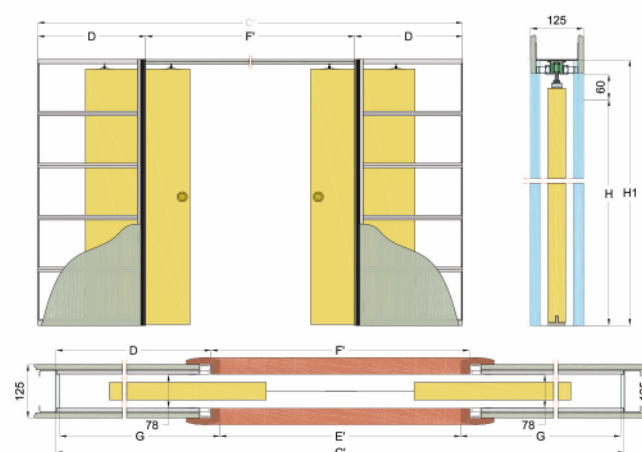

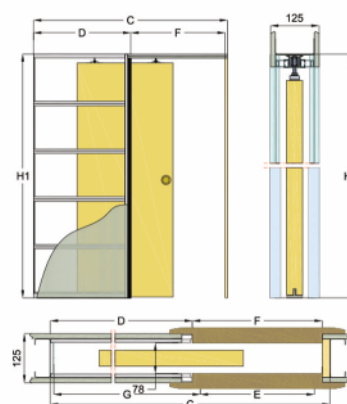

In case of application of modular doors there is no possibility of ventilation undercutting in sliding leaf.

Options for extra payment:

Steel oval hand-rails or round in gold or chrome colour.

Set of hand-rails for one sliding leaf consists of 2 pieces.

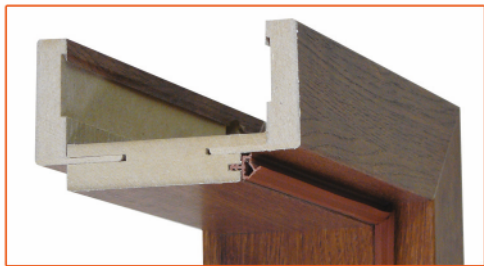

Hook lock with a complete set of oval or round hand-rails in version with a key or WC in gold or chrome colour.

NOTE: System provided exclusively to the wall thickness of 125mm

Adjustable Frame (OR)

Structure:

Body of the door frame consists of the MDF board 22mm thick. The front part (from the door side) and the adjustment part are flat angular slats. The above elements are covered with PREIMPREGNATE and TOP-DÉCOR foil, as well as CPL or ECOLINE laminates. Product enables to change width in the range of 40mm, and it's different scopes enable placing in on a wall with the thickness from 80mm to 500mm.

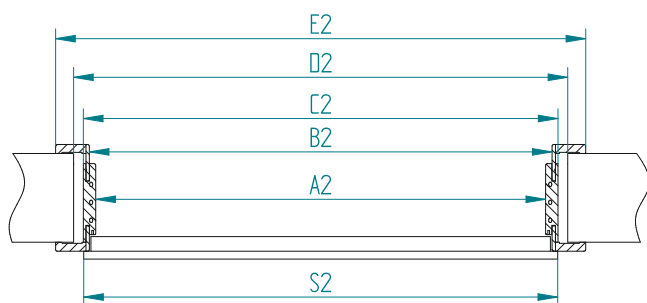

Every adjustable door frame has an option for the third hinge.

Application:

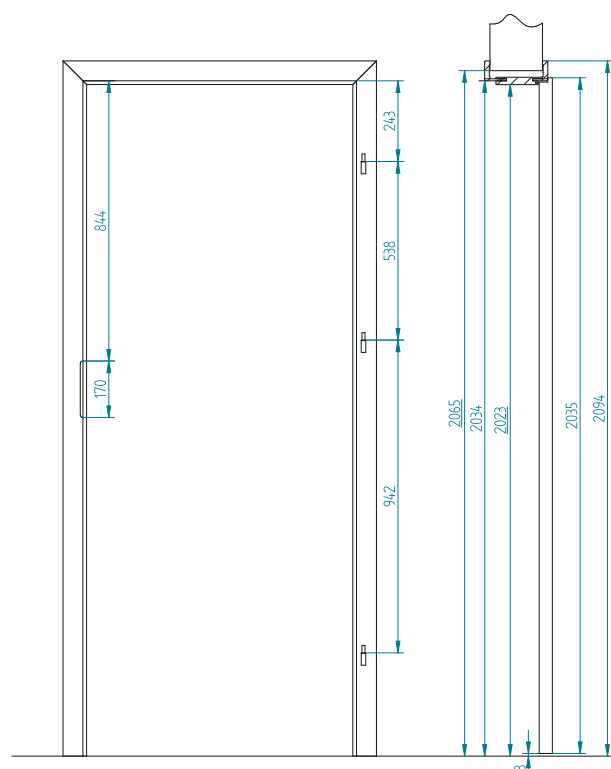

- With two hinges mounted: All indoor rebate doors foiled and varnished apart from "Solid", "Solid Alu", "Volume Set", "Volume AluSet".
- With three hinges mounted: All modular doors as well as glass models "Oskar", "Nobel", "Gremium", "Regis"

Adjustable frame consists of:

A set of vertical right or left bases (according to the opening direction) along with masking elements, hinges, door seal, accessories necessary for assembly of the door frame, an upper horizontal beam suitable for the door leaf width along with masking elements.

Adjustable Non-Rebate Panel Frame (OPB) “R”

Structure:

Door frame adapted for installation of non-rebate doors with invisible hinges. Body of the door frame consists of the MDF board 22mm thick. The front part (from the door side) and the adjustment part are flat angular slats. The above elements are covered with PREIMPREGNATE and TOP-DÉCOR foil, as well as CPL or ECOLINE laminates. Product enables to change width in the range of 20mm, and it's different scopes enable placing in on a wall with the thickness from 96mm to 516mm.

Every adjustable door frame has an option for the third hinge.

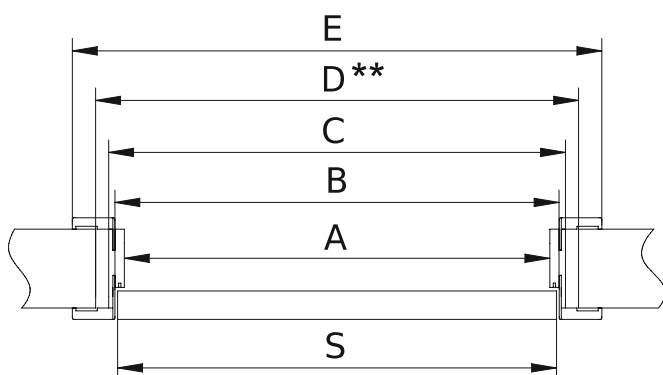

Application:

- All models of leaves from this catalogue, present in a non-rebate version. The non-rebate panel door frame consists of:

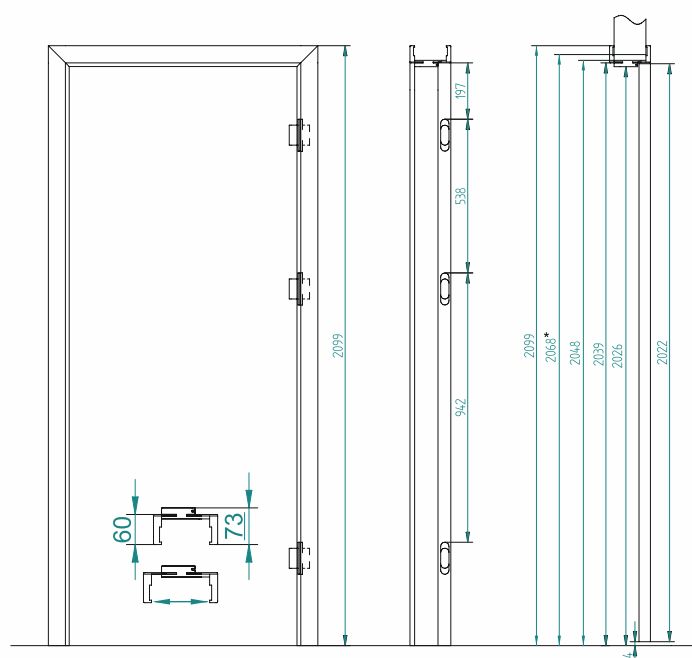

A set of vertical right or left bases (according to door opening direction) along with masking elements, invisible hinges, door seal, accessories needed for door frame installation, upper horizontal beam suitable for the door leaf width along with masking elements.

Note:

For non-rebated door frame installation, it will be necessary to provide additional losses in the wall hole to make space for covers of the hidden hinges.

** Suggested width of the wall hole

Overlay Door Frame – Camouflage (ON)

Application:

Camouflage to frame applies to:

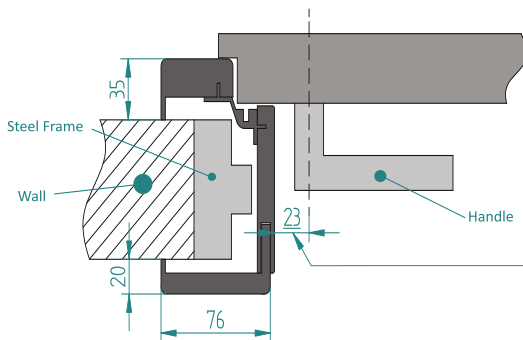

- Building of the old door frame by its total covering – without the need of dismantling (does not significantly reduce the size of the wall hole)
- Camouflage has regulation of width and it does not only cover the existing frame but also the whole thickness without the need to install additional strips
- Possibility of covering each metal door frame, also with the wall surrounding it
- Possibility to change direction of doors.
